PROFESSIONAL EXPERIENCE

Senior Software Engineer, Performance Marketing, Agave Games | Istanbul, Turkey — Apr. 2026 - Present

- Own playable ads end-to-end for a 50M+ install puzzle portfolio; scaled one title, reaching $560K+ daily ROAS spend and 1M+ daily clicks.
- Drive rapid gameplay iteration and A/B testing with PMs, growth managers, and artists, shipping creative hooks that lift CTR, IPM, and CVR while keeping ads true to gameplay to protect early retention; benchmark competitor playables to stay ahead of market trends.
- Co-built Agave AI Studio, an internal AI creative platform replacing a third-party UGC tool at ~1/3 the cost, with AI video generation, 33-language localization, and an LLM agent that turns gameplay videos into playables.
- Built a JSON-driven, web-based playable templating system that lets designers and growth managers configure and ship playable variants without engineering, feeding high-volume creative testing.

Senior Playable Ads Developer, JustDice GmbH| Hamburg, Germany — Oct. 2024 - Apr. 2026

- Owned playable ads and IECs end-to-end across justDice's rewarded-gaming portfolio (20+ apps, 300M+ lifetime downloads, 20+ GEOs), including flagship Cash Giraffe (10M+ installs), from competitor benchmarking and concepting to post-launch optimization of CTR, IPM, CVR, and ROAS.
- Built an internal TypeScript/Node.js platform for playable ad, HTML5 game, and IEC production with automated asset compression and one-click multi-network export, plus AI-powered Unity, Photoshop, After Effects, and Figma plugins rolled out across teams, cutting production time per creative.
- Analyzed A/B tests and in-playable interaction-event data to find engagement and drop-off points across the ad-to-install funnel, matching ad promise to in-app experience to lift install rate and user quality (retention, LTV).

Playable Ads Developer& Consultant (External), MY.GAMES | Amsterdam, The Netherlands — Mar. 2025 - Mar. 2026

- Designed and developed playable ads for mobile games in TypeScript, Three.js, and PixiJS, delivering single-file, MRAID-compliant creatives within each ad network's size and CTA rules for global UA campaigns.
- Advised on the technical and creative approach for each playable, optimizing load time and runtime performance on low-end devices and tightening core gameplay hooks to lift CTR and IPM.

Playable Ads Developer, JustDice GmbH | Hamburg, Germany — Apr. 2023 - Oct. 2024

- Developed size-optimized playable ads and HTML5 games in Unity, Luna Playworks, and C# for justDice's rewarded-gaming apps, aligned with UA strategy and optimized for CTR, IPM, and CVR.
- Created performance-optimized 2D/3D assets in Blender, Photoshop, and Figma, balancing visual quality against strict ad-network size limits.
- Built Unity, Photoshop, After Effects, and Figma plugins (C#, ExtendScript, UXP, JavaScript) automating store screenshots, end cards, and localized marketing assets, speeding up the creative team's production.

Playable Ads Developer, Panteon Games | Ankara, Turkey — Nov. 2021 - Apr. 2023

- Developed Unity/Luna playable ads for hyper- and hybrid-casual titles, turning core gameplay into size-optimized creatives for global UA campaigns.
- Built reusable playable ad templates and internal Unity packages used by designers and UA/growth managers, speeding up creative A/B testing across ad networks to improve IPM and CPI.
- Mentored junior playable ad developers on the production pipeline, ad-network requirements, and performance-marketing fundamentals.

Marketing Game Developer, Panteon Games | Ankara, Turkey — Nov. 2021 - Apr. 2023

- Rapidly prototyped ad-ready gameplay in Unity (C#) for video creatives and marketability tests, validating creative hooks before full production.
- Worked with UA, and creative teams to iterate on mechanics and capture the gameplay moments that drove the highest CTR and IPM in campaigns.
- Built reusable Unity tools and editor extensions that sped up creative iteration for the marketing team.

Game Developer (Intern), GEFEASOFT | Mugla, Turkey — Mar. 2021 - Jul. 2021

- Developed WebGL and HTML5 based serious games. by using C# and Unity.
- Designed gameplay systems, optimized performance for web deployment, and participated in feature development throughout the project lifecycle.

EDUCATION

M. Sc., Informatik (Computer Science), University of Hamburg — Apr. 2025 - Jan. 2026

- Incomplete: Relocation

B. Sc., Electrical & Electronics Engineering (%100 English), Eskisehir Osmangazi University — Sep. 2016 - Aug. 2021

- 3.01/4.00 GPA
- Worked as an intern in the Artificial Intelligence and Robotics Lab. Played an active role in developing the website for the course.

SKILLS

Programming Languages: C#, TypeScript, JavaScript, Python, C++

Game Development: Unity, Unity Playworks (Luna), Cocos Engine, ThreeJS, PixiJS, GSAP, GLSL, R3F

Frontend: HTML, CSS, Sass, TailwindCSS, React

Backend & DataBases: .Net, Node.JS, Express, MySQL, PostgreSQL, MongoDB, Prisma, Redis, RabbitMQ

DevOps & Tools: git, npm, Webpack, Vite, Docker, CI/CD, Jest, UXP

Design Tools: Blender, Spline, Figma, Adobe Photoshop, Adobe After Effects, Adobe Premier Pro

Soft Skills: Marketing KPIs Analysis, A/B Testing & Experimentation,AI-Assisted Engineering & LLM Tooling,Creative Strategy & Competitor Benchmarking, Problem Solving, Cross-functional Communication, Quick Learner, Mentoring

LANGUAGES

Turkish: Native | **English:** C1 *EF Standard Test: 81/100* | **Korean:** A2 *TOPIK I: 156/200* | **German:** A2

ACTIVITIES

Founder, Crabtic | Hamburg, Germany — Aug. 2025 - Present

Co-Founder& Administrative Assistant, Korean Culture Academy | Eskisehir, Turkey — Jun. 2019 - Nov. 2021

IGET-IT Member, AIESEC Turkey | Eskisehir, Turkey — Oct. 2017 - Jun. 2018

PROJECTS

Agave Video Studio — Jun. 2026 - Aug. 2026
Python, React, AWS3, ElevenLabs

- Developed an internal dashboard for managing marketing video generation across multiple mobile game titles, with asset tracking, Drive-based bulk imports, automated rendering, and AI-powered subtitles using ElevenLabs.

base122-encoding (npm package) — Dec. 2025 - Jan. 2026
TypeScript, NodeJS, Vite

- Developing a package implementing Base-122 encoding, reducing data size by up to ~30% compared to Base-64 for use in data URIs.

Figma Design Plugin — Jul. 2025 - Dec. 2025
TypeScript, HTML, CSS, Figma, Vite

- Developed a Figma plugin that automates the creation of static store screens, network end-cards, and marketing assets, featuring DeepL API integration for seamless multi-GEO translations.

texture-optimize-pro (npm package) — Oct. 2025 - Oct. 2025
TypeScript, NodeJS, Sharp

- Developed a texture optimization library for HTML5 games (PixiJS/ThreeJS), leveraging Sharp for high-performance image processing with per-texture configuration of max size, format, and quality.

Text Localization - GEO Package — Jan. 2025 - Feb. 2025
TypeScript, NodeJS

- Developed a localization package, that detects device language and updates playable ads/ HTML5 game texts for multilingual support.

AdCraft — Oct. 2024 - Oct. 2024
HTML, CSS, TypeScript, Tailwind, React, Vite

- Developed a tool designed to streamline the manipulation of ad network requirements and enable efficient build generation by providing a simple interface for playable ads/ HTML5 games.

Adobe Photoshop Design Tool — Jul. 2023 - Dec. 2023
ExtendScript, JavaScript, CSS, HTML, UXP, Adobe Photoshop

- Developed a Adobe Photoshop extension focused on generating static store screens, network end cards and marketing purposed resources.

Unity Playable Ads Kit — Apr. 2022 - Sep. 2023
C#, Unity

- Developed a plugin for playable ads development, featuring essential template generation, translation(localization) package, utility methods, etc.

Semantic Segmentation using Deep Learning (Graduation Project) — Sep. 2020 - Jun. 2021
Python, NumPy, PyTorch, pandas, SciPy, OpenGL, Linux

- Utilized python libraries with deep learning techniques to implement deep learning methods for semantic segmentation, enhancing a robot's functionality in search and rescue scenarios.

CERTIFICATIONS

Google Ads Certification, Google — Aug. 2026

- Google Ads Apps, Google Ads Measurement, AI-Powered Performance Ads

Three.js Journey, by Bruno Simon — Jun. 2024

- JavaScript, ThreeJS, CannonJS, GLSL, GSAP, R3F, HTML, CSS, Blender, Rapier

Back-End Apps with Node.js and Express, IBM — Dec. 2023

- JavaScript, Node.JS, Express

Professional Meta Front-End Developer Certificate, Meta — Nov. 2023

- JavaScript, HTML, CSS, Bootstrap, Sass, React, npm, Jest, Figma

Intermediate Object-Oriented Programming for Unity Games, University of Colorado — May. 2021

- Unity, C#
